# A200

## ORIGINAL OPERATING INSTRUCTIONS

Coffee machine: FCS4039 - Refrigeration unit: FCS4048

Read the operating instructions and the chapter "For your safety" before operating the machine.

Keep the operating instructions near the machine.

## DEAR CUSTOMER

With the A200/A200 FoamMaster, you have chosen a powerful and space-saving coffee machine.

Thank you for your confidence in us.

The A200/A200 FoamMaster adapts to your needs perfectly. Your customers will be impressed. You will be able to offer high-quality coffee specialties rapidly and individually.

We hope you enjoy your coffee machine and that it will bring you consistently happy customers.

Sincerely, Franke Kaffeemaschinen AG

### FOR YOUR SAFETY

Both you and the coffee machine are important to us. Therefore, we would like to provide you with detailed safety information. For our products, a high degree of safety goes without saying. Protect yourself against residual risks arising from the functions of the machine.

### Proper use

#### A200

The A200 is a coffee machine for use in food service, offices and similar environments. It is designed to process whole coffee beans, ground coffee, capsules (optional) and fresh milk.

Your coffee machine is designed exclusively for preparing coffee drinks, capsule drinks (optional) and hot water in accordance with these instructions and the technical data.

### Refrigeration unit

A refrigeration unit is an optional add-on unit for your A200 that is used exclusively for keeping milk cool for beverage preparation on an A200 coffee machine.

Only use pre-cooled milk (2-5 °C or 36-41 °F).

Only use FRANKE clean solution for cleaning the milk system. Other cleaning agents may leave residue in the milk system.

#### FoamMaster

The FoamMaster is an add-on unit for your A200 FM, that is used exclusively for keeping milk cool and for the foaming of milk on an A200 FM coffee machine.

Only use pre-cooled milk (2 - 5 °C or 36 - 41 °F).

Only use FRANKE clean solution for cleaning the FoamMaster.

Other cleaning agents may leave residue in the milk system.

### Cup warmer (optional)

The cup warmer is an optional add-on unit for your coffee machine. It is intended only for warming coffee cups and glasses used when preparing drinks.

The cup warmer is not designed to dry dish towels or other cloths. It is not necessary to cover the cups to warm them.

Do you have any questions or problems that are not addressed in these instructions? Please do not hesitate to contact Customer Service or your Service technician.

### **Important**

- Do not operate the coffee machine or add-on units until you have completely read and understood these instructions.
- Keep these instructions near your coffee machine.
- Your coffee machine is intended for use by trained personnel.
   Each operator of the coffee machine must have read and understood these instructions. This does not apply for self-service customers. Self-service machines must always be monitored to protect the users.
- The device is not suitable for children under the age of 8 years.
   Children above the age of 8 or persons who are challenged with respect to physical, sensory or mental abilities must never approach the machine alone and must always be supervised.
   Children are not allowed to play with the appliance. Children are not permitted to perform any cleaning on the machine.
- The coffee machine is intended exclusively for operation in interior rooms.
- Have the machine serviced at regular intervals. Regular maintenance will ensure the safe operation and high performance of your coffee machine.
- If the machines are sold or transferred to a third party, give the operating instructions to the next user.
- You will find statements regarding the conformity of your coffee machine in the accompanying Declaration of conformity.

### **A** DANGER

Risk of death by electrocution!

Never operate a machine that has been damaged or has a damaged power supply cable.

General safety concerns when using the A200

- If you suspect damage to the machine (for instance, a hot or burning odor), unplug the machine from the outlet and contact your Service technician.
- Never open or attempt to repair the machine yourself.
- Do not make any modifications to the machine that are not described in the operating instructions.
- Repairs should only be made by your Service technician using original replacement and accessory parts.

If the power supply cable to this machine is damaged, it must be replaced by a suitable power supply cable.

- Only a qualified Service technician should replace the power supply cable.
- Ensure that the machine and power supply cable are not near any hot surfaces such as gas or electric stoves or ovens.
- Ensure that the power supply cable is not pinched and does not rub against sharp edges. The machine contains electrically conductive parts. Opening the machine can pose risk of death.

### **⚠** WARNING

#### Risk of injury

Reaching into the machine may result in abrasions or crushing injuries from interior components.

- Remove only the components of the machine intended for this purpose insofar as required by daily work (grounds and capsule container, drip tray, water tank, coffee bean hopper).
- Exercise care and caution when working in an open machine.
- Only Service technicians should open the machine for maintenance or repair.

### **⚠** WARNING

Risk of injury, eye injury and damage to the machine

If objects find their way into the bean hopper, the capsule system, the powder feed or the grinder, splinters may be ejected, leading to injuries or damage to the machine.

• Never put any objects into the coffee bean hopper, the capsule system, the powder feed or the grinder.

### **⚠** WARNING

Danger of burns

The combined outlet, the hot water outlet and the steam wand become hot.

• Do not touch the outlets or nozzles.

The surfaces of the cup warmer become hot.

· Do not touch these surfaces.

### 

Risk of scalding

During cleaning, hot water and steam are released repeatedly.

• Keep hands away from the outlets and nozzles during cleaning.

When drinks are dispensed, the products pose a risk of scalding.

• Always be careful with hot drinks.

#### 

#### Danger from spoiled food residue

If the machine is not cleaned regularly, milk and coffee residue may accumulate in the machine or clog the outlets. Products could become contaminated as a result.

• Clean the coffee machine and add-on units at least once a day. See chapter "Care of the A200", p. 32.

### **⚠** CAUTION

#### Risk of contamination

When the machine is not in use for extended periods, residue may accumulate.

• Rinse the coffee machine before initial use and when not in use for extended periods (more than 2 days).

### **⚠** CAUTION

#### Danger of tripping

Suspended cables or ones lying on the floor could cause people to trip.

• Do not let the power supply cable hang loose.

### NOTE

#### Damage from liquids

The coffee machine is not protected against spray water and can be damaged by the effects of liquids.

- Avoid using water jets for cleaning and do not use high-pressure cleaners.
- Do not fill up any part of the machine with water except the water tank intended for that purpose.
- Do not fill up any part of the machine with milk except the milk container intended for that purpose.
- Disconnect the machine from the power supply without delay if milk or water

#### NOTE

Damage to the coffee machine caused by adverse weather conditions Adverse weather conditions could damage the machine and impair its functions.

Do not expose the machine to the elements, such as rain, frost or direct sunlight.

## **EXPLANATION OF SYMBOLS**

So that you can get the most out of your A200, we would like to familiarize you with the symbols used in the operating instructions and the software. For us, thorough information and open communication go without saying.

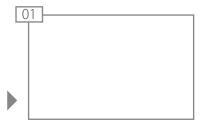

## Symbols from the Operating instructions

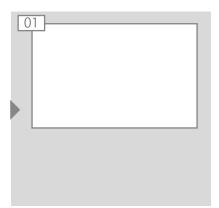

parts.

This symbol indicates tips, shortcuts and additional information.

Describes and illustrates a step that you must perform.

Steps highlighted in color are optional and must be performed only on the corresponding machine versions.

# Symbols used in the software

# Depiction of error messages

Highlighted products cannot be prepared. The dashboard can be called up with the "roller shutter".

A colored symbol in the dashboard indicates an error. Pressing the symbol will display further information and troubleshooting instructions.

Certain processes can be activated directly from the error message (e.g. Cleaning).

If the entire system is affected by an error, then the error message will appear automatically.

## Color code for error messages

## SCOPE OF DELIVERY AND IDENTIFICATION

The A200 is a powerful coffee machine. Its modern operating concept will help you keep your cool in any situation. Listed below are ways to identify your machine and what is included in the standard scope of delivery.

## Scope of delivery

#### A200 with MS1

A200 FoamMaster

Item	Designation	Item no.
	Cleaning tablets (100 pcs.)	BK328400
	Clean solution MS1	1L301219
	Clean solution for FoamMaster	1Z365033
	Descaling agent	1P315430
	Cleaning container (A200 FoamMaster)	
	Microfiber cloth	1H325974
	Dosing spoon	1N330799
	Filter holder	1N330385

Item	Designation	Item no.
	Filter cartridge (for appliances with water tank)	1P315694
of the	Measuring strips (for determining water hardness)	1N330577
	Grinder adjustment wrench	1N330253
	USB stick (optional)	1H329064
#200	Original Operating Instructions  Declaration of conformity	1A335001 1A335287
of the same	Keys (A200 FoamMaster)	1N330314

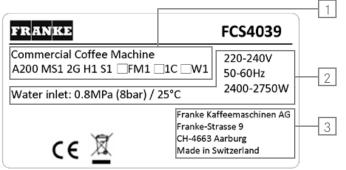

The scope of delivery may vary, depending on the device configuration. Please refer to your purchase agreement.

Additional accessories may be obtained directly from your retailer or from Franke Kaffeemaschinen AG in Aarburg, Switzerland.

### Type plates

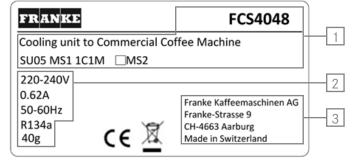

The type plate is located behind the water tank.

Type plate A200 (coffee machine)

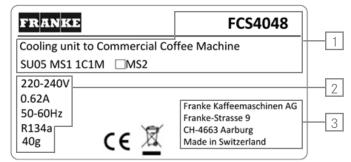

The type plate for the refrigerator is located in the cooling room.

Type plate SU05 (MS1)

The type plate for the Foam-Master is located in the cooling room.

Type plate SU05 (FoamMaster)

- Type (type key see right)
- 2 Technical data
- 3 Manufacturer

### Type key

A200	Machine name (fully automatic device)
MS1	Milk system in accordance with the Venturi principle (hot milk, hot milk foam)
2G	Number of grinders
H1	Hot water
S1	Steam wand
FM1	FoamMaster (cold and hot milk, cold and hot milk foam)
1C	Capsule system
W1	Fixed water connection

## **DESCRIPTION**

You have chosen enjoyment of every single coffee with the A200. In this section you will learn more about the functions and options of your coffee machine and where the controls are located.

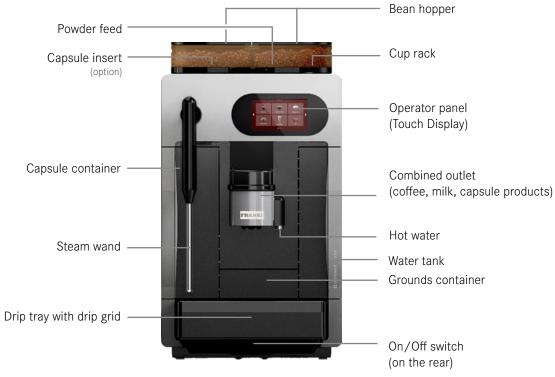

## Coffee machine A200/A200 FoamMaster

#### Introduction

The coffee machine can be operated with water tank or with fixed water connection. A capsule system is available as an option. Depending on your requirements, you can select further options and add-on units. In order for you to obtain an overview of your machine, we are presenting here the standard version.

The configuration of your coffee machine may differ from that shown in the instructions.

#### A200

### Add-on units

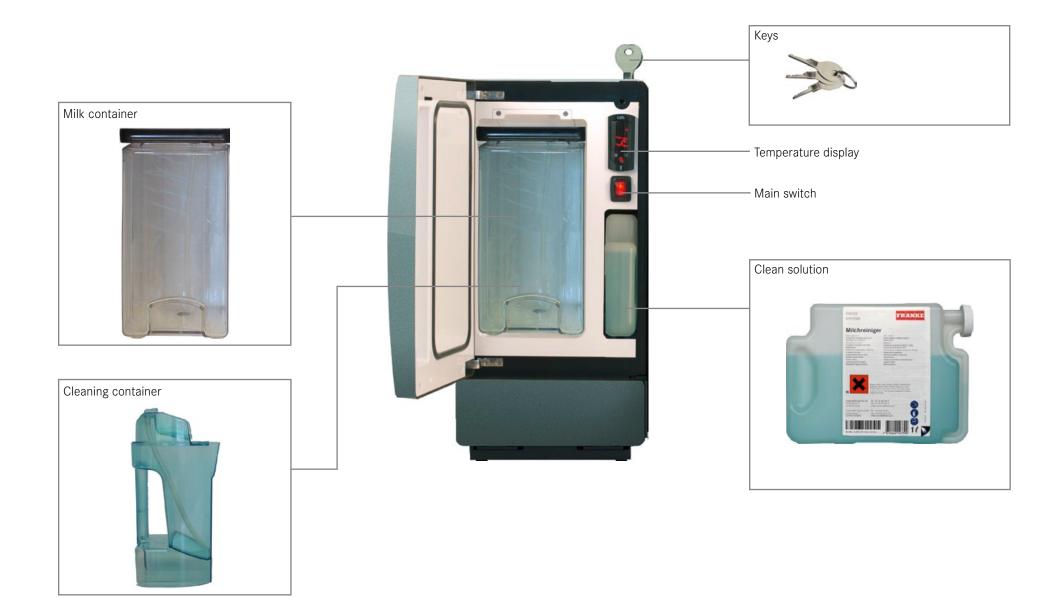

Refrigeration unit In many regions, milk is part of a good cup of coffee. You can connect the refrigeration unit directly to the A200 to make sure the milk stays fresh (MS1).

Cup warmer
To enjoy coffee at its best, you
need pre-heated cups. The cup
warmer fits perfectly on your A200.

## The operating interface

The dashboard can be called up with the "roller shutter". See p. 16.

The circles show the available pages. The filled circle marks the current position.

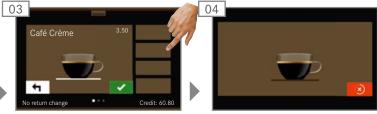

Scrolling forwards or backwards; the white arrow shows that additional pages are present. If no more arrows appear, then the active page is the last one in this direction.

### Preparing drinks

Press on the arrow to scroll.

Tap the respective button to select a drink.

In order to individualize the beverage further, tap on selection button(s) (visible only if the selection buttons are configured).

The drink is being prepared

Additional information on the preparation of drinks can be found in the chapter "Preparing drinks". See p. 26.

#### The dashboard

Press the "roller shutter" to call up the dashboard.

The dashboard appears.

The symbols for the error messages are displayed in the dashboard.

To call up the more detailed error message, press the corresponding symbol.

The error message is displayed.

Press the arrow to go to the next error message.

Error messages contain the error code, a key word, an error description and handling instructions for rectifying the error.

Click on the Franke logo to switch to programming mode. The numerical pad appears for entering the PIN.

Additional information on administration, product settings, individualization, care and machine information can be found in the "Configuration" chapter. See p. 41.

## INSTALLATION AND TECHNICAL DATA

Your coffee machine must be properly installed so that you can operate it correctly – your Service technician will do that for you. You'll have to take care of a few things first. You'll find the preparations for problem-free enjoyment of your coffee machine here.

### Installation

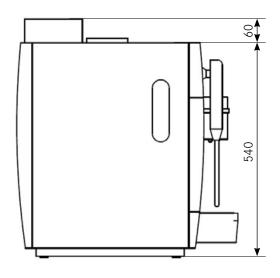

#### Requirements

- The power connection for the coffee machine must be protected by a ground fault circuit interrupter (GFCI).
- Each terminal of the power supply must be able to be interrupted by a switch.
- For operation with a fixed water connection, this must have a water shut-off with a check valve that can be inspected and a filter. The fixed water connection must meet the requirements of the technical data and of local regulations.
- The coffee machine must be connected to the water supply with the hose set supplied. Do not use any other water hoses that happen to be present.
- The water for coffee preparation should always be fresh, oxygenated and rich in minerals.

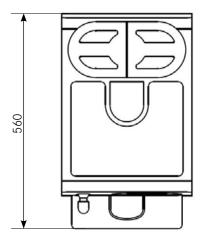

Once the requirements are met, one of our service technicians will install your coffee machine and put it into operation for the first time. The technician will walk you through the basic functions.

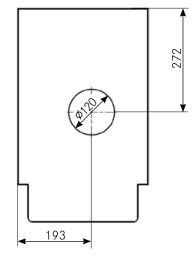

### Technical data of the A200/A200 FoamMaster

Bean hopper	0.6 kg per hopper (optional: lockable)		
Water tank	4.0 liters		
Grounds container	40 cakes		
Capsule container	10 empty capsules		
Drip tray (monitored)	2.5 liters		
Electrical connection	220 - 240 V 1LNPE 2.4 - 2.75 kW 50/60 Hz Fuse: 16 A, without power management		
	220 - 240 V 1LNPE 1.2 - 1.50 kW 50/60 Hz Fuse: 10 A, with power management		
	100 V 2LPE 1.5 kW 50/60 Hz Fuse: 15 A		
	120 V 2LPE 1.8 kW 60 Hz Fuse: 15 A		
Electric cable	I = 2,000 mm		
Waste-water hose (optional)	Not permanently attached to the drain (vented), $d = 14.5$ mm, $l = 2,000$ mm		
Noise emission	< 70 dB (A)		
Weight	Approx. 20 - 25 kg		
Width	340 mm		
Depth	560 mm		
Height	604 mm		
Fixed water connection (optional)	Metal hose with union nut G 3/8", I = 1,500 mm (59")		
Water supply line	If possible on installation side: untreated water (not from household decalcification system)		
Water pressure	80 - 800 kPa (0.8 - 8.0 bar)		
Water temperature	< 25 °C		
Water shut-off	With checkable check valve and filter		
Water hardness	max. 70 mg CaO/1 l water (7 dH, 13 °fH)		
Chlorine content	max. 0.1 mg/l (WHO recommendation: max. 0.5 mg/l)		
Ideal pH value	7		
Drain pipe	dmin = 1"		
Ambient conditions	Humidity: max. 80 % Ambient temperature: 10 - 35 °C		

Buffet feed-through for grounds

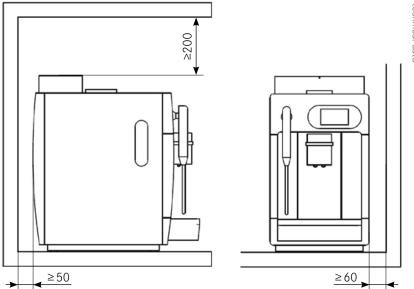

Adjustable feet

	Total height
40 mm	600 mm + 40 mm = 640 mm
100 mm	600 mm + 100 mm = 700 mm

### Installation dimensions of the A200

Prepare a stable, ergonomic surface (min. load capacity: 100 kg or 220 lb). The operator panel should be no higher than at eye level.

#### Minimum clearances:

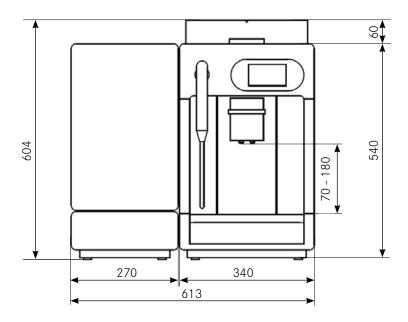

- To the rear wall: 50 mm
- Upwards: 200 mm (filling and removal of coffee bean hopper)
- To the right: 60 mm (for removal of the brewing unit)
- To the left: 60 mm (for opening the refrigeration unit)

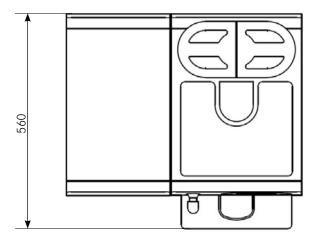

Adjustable feet (optional) can be used to compensate for unevenness or height differences.

If optional add-on units are installed, up to an additional 330 mm of width may be required.

Page 18 Installation and technical data

#### Dimensions of the A200 FoamMaster

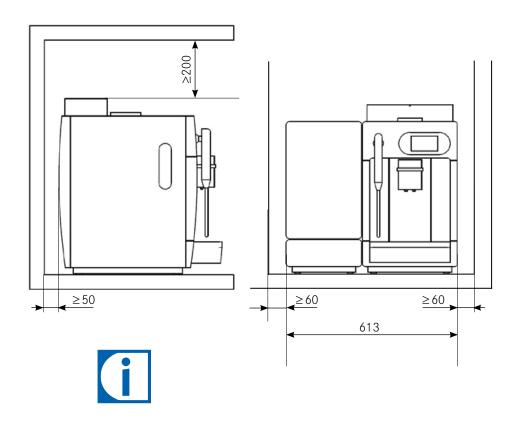

### Adjustable feet

	Total height
40 mm	600 mm + 40 mm = 640 mm
100 mm	600 mm + 100 mm = 700 mm

#### Installation dimensions of the A200 Foam-

Prepare a stable, ergonomic surface (min. load capacity: 100 kg or 220 lb). The operator panel should be no higher than at eye level.

#### Minimum clearances:

- To the rear wall: 50 mm
- Upwards: 200 mm (filling and removal of coffee bean hopper)
- To the right: 60 mm (for removal of the brewing unit)
- To the left: 60 mm (for opening the refrigeration unit)

Adjustable feet (optional) can be used to compensate for unevenness or height differences.

If optional add-on units are installed, up to an additional 330 mm of width may be required.

## Technical data MS (optional)

Milk container	51
Electrical connection	FM: 200-240 V 1LNPE 1.95 - 0.72 kW 50/60 Hz Fuse: 10 A
Electric cable	2000 mm
Ambient conditions	Humidity: max. 80 %
	Ambient temperature: 10 - 40 °C
Coolant	R134a / 37 g
Climate class	N (temperate climate)
Noise emission	<70 dB (A)
Cooling temperature	2.0-5.0 °C
Weight	Approx. 16 kg
Width	270 mm
Depth	474 mm
Height	540 mm (211/4")

## Technical data FoamMaster (optional)

Milk container	51
Electrical connection	FM: 200-240 V 1LNPE 1.95 - 2.3 kW 50/60 Hz Fuse: 10 A
Electric cable	2000 mm
Ambient conditions	Humidity: max. 80 %

Height	540 mm

## Technical data for the cup warmer (optional)

Capacity	Up to 120 cups (depending on cup size)
Electrical connection	200 - 240 V 1LN PE 100 W 50/60 Hz Fuse: 10 A
Electric cable	2000 mm
Weight	Approx. 20 kg
Width	270 mm
Depth	475 mm
Height	540 mm (211/4")

## **COMMISSIONING**

In this chapter you will learn how to start up your coffee machine for the first time. In addition to the start-up procedure, you will also learn about processes that take place automatically during daily commissioning.

## Initial commissioning of the A200

Your service technician will put your coffee machine in operation for the first time and instruct you in its operation.

Later recommissioning will also be undertaken by your service technician.

## Daily commissioning of the A200

### **MARNING**

Risk of scalding

The machine releases hot water and hot steam after being switched on.

 Do not touch the machine below the outlets or the outlets themselves.

If necessary, switch machine on at the power switch.
Tip on the operating interface.
The machine starts.

The coffee machine automatically vents and rinses after heating.

Add coffee beans and milk, if necessary.

In addition to this, fill up with water for operating with water tank.

The coffee machine is ready for operation.

## FILLING AND EMPTYING

Ensure that all ingredients are always available. That way you will able to offer your customers the wide assortment of your product range at all times. Get primed for a successful day.

### Filling the coffee machine

### Adding coffee beans

### **MARNING**

Risk of injury, eye injury and damage to the machine If objects find their way into the bean hopper or grinder, splinters may be ejected, leading to injuries or damage to the machine.

• Never put any objects in the coffee bean hopper or grinder.

Open the bean hopper.

Add coffee beans.

Attach the bean hopper cover and lock it (optional).

### Filling the water tank (optional)

### NOTE

Machine damage Incorrect filling of the machine

 Fill the water tank with water only.

causes damage to the machine.

- Disconnect the machine from the power supply if there is milk in the Fluid-System
- Call Service

Information regarding the insertion and replacement of the water filter can be found in the chapter "Care of the A200", p. 32.

Pull out the water tank. Remove the lid.

Fill the water tank. Use the lid to close the water tank.

Replace water tank and slide it into the machine until it hits the stop.

### Adding milk with FoamMaster (optional)

#### NOTE

The quality of the milk may be impaired.

- Only clean containers should be filled with milk.
- Only use pre-cooled milk (2-5 °C or 36-41 °F).
- Only touch the intake hose, the inside of the milk container and the milk lid after sanitizing your hands, or wear disposable gloves.
- Place the container lid with the suction hose only on a surface that is clean.

Open the door and switch on the FoamMaster.

The current cooling chamber temperature is displayed.

Remove milk container.

Clean the milk container and intake hose.

Fill the milk container with a maximum of 5 I of cooled milk.

Fit the container lid.

Slide the milk container all the way in.

Close the door.

### Adding milk with MS1 (optional)

#### NOTE

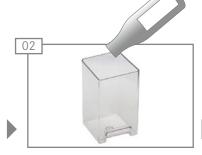

The quality of the milk may be impaired

- Only clean containers should be filled with milk.
- Only use pre-cooled milk (2 5 °C or 36 41 °F).
- Only touch the intake hose after sanitizing your hands or wear disposable gloves.
- Place the container lid with the suction hose only on a clean surface.

Open the door. Pull intake hose out of the machine.

Remove the milk container towards the front.

Remove the lid.
Fill the milk container with milk and seal it with the cover.

Slide in the milk container. Insert the intake hose through the opening in the cover. Close the door.

## Emptying the coffee machine

Emptying the drip tray, grounds container and capsule container

#### NOTE

Formation of mildew Coffee residue can lead to mildew formation.

 Empty and clean the grounds container and the drip tray at least once daily.

### **MARNING**

Risk of scalding

The drip tray may contain hot water.

- Allow the water in the drip tray to cool down.
- Transport the drip tray carefully.
- Empty the drip tray slowly and carefully.

Empty drip tray.

Pull out the capsule container and empty it.

Pull out and empty the grounds container.

Clean and dry the drip grid, drip tray, grounds container and capsule container.

Insert the capsule container and grounds container.

Replace the drip tray.

### Emptying the water tank

Pull out the water tank all the way. Remove the lid.

Empty and clean the water tank.

Use the lid to close the water tank.

Replace water tank and slide it into the machine until it hits the stop.

### Emptying the bean hopper, changing the grind coarseness

Open the two bean hopper covers (optional) and remove them.

Turn locking knob counterclockwise.

Remove bean hopper by pulling it out straight up.

Empty, clean and dry the bean hopper.

#### NOTE

#### Loss of coffee quality

Moisture and cleaning agent residue have a negative influence on coffee quality.

 Dry the bean hopper well after cleaning it. It must not contain any moisture or cleaning agent residue.

If needed, the grind coarseness can be set in stages for each coffee grinder.

Set the grind coarseness with the grinder adjustment wrench.

- Finer grind: turn counterclockwise.
- Coarser grind: turn clockwise.

Insert the bean hopper.

Turn locking knob clockwise.

Attach the bean hopper cover and lock it (optional).

### Emptying milk

#### NOTE

#### Spoiled milk

Insufficient cooling or hygiene can cause milk to spoil.

- Do not use the refrigeration unit to store milk outside of periods of operation.
- Store the milk in a refrigerator.
- Clean the coffee machine and refrigeration unit once a day (see p. 32).

Open the door. Remove the suction hose on MNS1.

Remove the milk container towards the front.

Store the milk in a refrigerator or dispose of it, if necessary.

Clean the milk container and the refrigeration unit.

## PREPARING DRINKS

You chose the A200 because you love coffee and want to offer your customers something special. In this section you will find information about preparing drinks and the variations possible for your specialty drinks.

## Preparing a standard drink

Place an appropriate cup or glass under the outlet.

Set the outlet height.

### **MARNING**

Risk of scalding or burning

The dispensers and drinks are hot.

button(s) (visible only if the se-

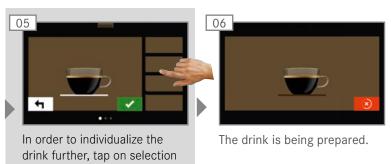

lection buttons are configured).

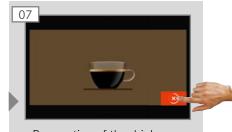

- Do not touch the area under the outlets.
- In case of scalding or burns, immediately cool the affected area and, depending on the severity of the injury, consult a doctor.

Press the arrow to scroll.

Tap the respective button to select a drink.

Preparation of the drink can be canceled by pressing the Cancel button.

## Preparing two drinks at once

Place two appropriate cups or glasses under the outlet.

Set the outlet height.

## **WARNING**

#### Risk of scalding or burning

The dispensers and drinks are hot.

- Do not touch the area under the outlets.
- In case of scalding or burns, immediately cool the affected area and, depending on the severity of the injury, consult a doctor.

Press the arrow to scroll.

Tap the respective button to select a drink.

drink further, tap on selection button(s) (visible only if the selection buttons are configured).

The drink is being prepared.

Preparation of the drink can be canceled by pressing the Cancel button.

### Drink preparation with ground coffee

#### NOTE

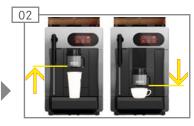

#### Damage from foreign objects

Putting foreign objects through the powder lid can lead to damage to the machine.

- Never insert any foreign objects.
- Never poke around in the powder lid with any object and never insert anything except cleaning tablets or ground coffee in the powder lid.

Place an appropriate cup or glass under the outlet.

Set the outlet height.

Open powder lid.

Tap the respective button to select a drink.

The prompt appears on the display to add powder.

For one cup, use approximately 7 - 9 g of ground coffee.

### **MARNING**

### Risk of scalding or burning

The dispensers and drinks are hot.

- Do not touch the area under the outlets.
- In case of scalding or burns, immediately cool the affected area and, depending on the severity of the injury, consult a doctor.

Fill in ground coffee and close powder lid.

The drink is being prepared

Cancel button.

## Drink preparation with capsule (optional)

#### NOTE

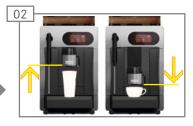

#### Damage from foreign objects

Putting foreign objects into the capsule system can cause damage to the machine.

- Only use the designated capsules.
- Never insert any foreign objects in the capsule system.

Place an appropriate cup or glass under the outlet.

Set the outlet height.

Select the desired product.

The prompt appears on the display to insert the capsule.

### **MARNING**

Risk of scalding or burning

The dispensers and drinks are hot.

- Do not touch the area under the outlets.
- In case of scalding or burns, immediately cool the affected area and, depending on the severity of the injury, consult a doctor.

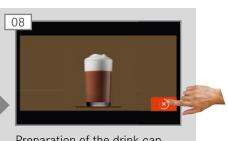

Open the capsule flap.

Insert the capsule. Close the capsule flap.

The drink is being prepared

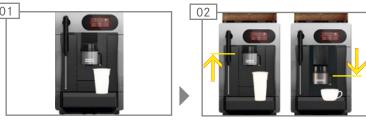

Preparation of the drink can be canceled by pressing the Cancel button.

## Hot water dispenser

- If the Simultaneous drink preparation function is not activated, all other products are blocked during hot water dispensing.
- Hot water can be stored either as a permanent product or as an individual product. In the case of permanent product, hot water will continue to be dispensed for as long as the button is pressed. In the case of an individual product, the quantity is defined.

These settings can be made only by a Service technician.

Place an appropriate cup or glass under the hot-water outlet.

### **MARNING**

Risk of scalding or burning

The dispensers and drinks are hot.

- Do not touch the area under the outlets.
- In case of scalding or burns, immediately cool the affected area and, depending on the severity of the injury, consult a doctor.

The dispensing of hot water begins.

Preparation of the drink can be canceled by pressing the Cancel button.

## Steam dispenser

Steam is suitable for the manual heating and foaming of milk and for the heating of other drinks.

Hold a suitable container under the steam outlet.

Select Steam.

Preparation starts and will end after the programmed output time.

## **WARNING**

Risk of scalding or burning!

The dispensers and drinks are hot.

- Do not touch the area under the outlets.
- In case of scalding or burns, immediately cool the affected area and, depending on the severity of the injury, consult a doctor.

The steam dispensing takes place until the Cancel button is actuated or for the programmed time period, respectively.

Select **Steam continuous**. Preparation begins.

Cancel preparation by pressing the **Cancel button**.

Wipe the steam outlet with a damp cloth after each use.

## CARE OF THE A200

Even a coffee machine like the A200 must be cared for. To ensure high-quality flavor, the A200 must be cleaned at least once a day and serviced at regular intervals.

## Cleaning

Your responsibility for the perfect coffee experience

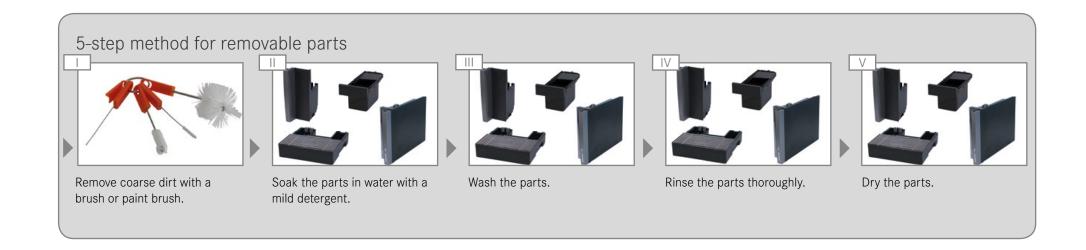

The perfect coffee experience depends on a perfectly cleaned coffee machine. Increase the quality of your products!

Clean your coffee machine at least once a day and more frequently if necessary.

Follow the 5-step method for all removable parts.

#### Accessories required:

- Cleaning tablets
- Microfiber cloth
- Cleaning container
- Clean solution

### This is how you start the automatic cleaning

Click on the "roller shutter" to call up the dashboard.
The dashboard appears.

Click on the Franke logo to switch to the Service Menu.

Select Clean and confirm.

The automatic cleaning cycle starts.

### **MARNING**

#### Risk of scalding

During cleaning, hot water and steam are released repeatedly.

• Do not touch the machine below the outlets or the outlets themselves.

Follow the instructions on the display and confirm with **Continue**.

The machine guides you to the next step.

If you require a detailed guide for a certain step, you can find this under the 1 symbol in the bottom-right corner of the screen.

After the cleaning cycle, the machine switches back either to the product selection or into energy saver mode.

Your Service technician can set the desired option for you.

The milk system must be cleaned when prompted to do so. You can perform cleaning at any time by pressing the cleaning button on the machine.

Remove the milk container and keep the milk cool.

Slide the empty cleaning container all the way into the cooling chamber.

A query window will appear on the display.

Confirm cleaning by pressing **Yes**.

06

Follow the instructions on the display.

Click **Continue** when a corresponding button appears.

The machine guides you to the next step.

If you require a detailed guide for a certain step, you can find this under the ① symbol in the bottom-right corner of the screen.

### ⚠ WARNING

# Risk of scalding by hot liquids

Hot liquid is discharged during cleaning.

- Do not touch the area under the outlet.
- Treat any injuries that occur immediately.

Remove the cleaning container from the cooling chamber when prompted to do so. Empty liquid residues into the

wastewater.

Clean and dry the interior chamber, inner side of the door and door seal.

Clean the milk container and intake hose.

Slide the milk container all the way into the cooling chamber. Close door.

The machine is ready for service.

## Rinsing the A200 manually

- Rinsing does not replace daily cleaning. Rinsing is necessary to remove residue build-up in the coffee and milk systems.
- The A200 automatically rinses after certain time intervals, as well as when it is switched on or off. You can call up rinsing manually, however.

Click on the "roller shutter" to call up the dashboard.
The dashboard appears.

Tap on the Franke logo to switch to the Service Menu.

Press Configuration.

In the menu Configuration, select the menu item Care.

In the menu Config. > Care, select the menu item Rinsing.

The rinsing starts.

#### **⚠** WARNING

#### Risk of scalding

Hot water is released during rinsing.

- Do not touch the machine below the outlets or the outlets themselves.
- Do not place anything on the drip grid.

The machine is ready for service.

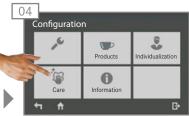

Click on the "roller shutter" to call up the dashboard.
The dashboard appears.

Tap on the Franke logo to switch to the Service Menu.

Press Configuration.

In the menu Configuration, select the menu item Care.

In the menu Config. > Care, select the menu item Descaling and confirm.

Descaling starts.

#### 

#### Risk of scalding

During descaling, hot water and steam are released repeatedly.

• Do not touch the machine below the outlets or the outlets themselves.

#### 

#### Skin and eye irritation

The descaler can cause irritations upon contact with skin or eyes.

- Observe the safety instructions on the packaging of the descaler
- Wear protective gloves and eye protection.

Follow the instructions on the display.

Click **Continue** when a corresponding button appears. The machine guides you to the next step.

If you require a detailed guide for a certain step, you can find this under the ① symbol in the bottom-right corner of the screen.

The machine is ready for service.

## Cleaning the water tank (for operation with a water tank)

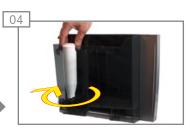

Pull out the water tank. Remove the lid.

Turn the filter cartridge counterclockwise and remove it.

Clean the water tank using the 5-step method.

Insert the filter cartridge in the filter holder and turn clockwise until it hits the stop.
Use the lid to close the water tank.

Replace water tank and slide it into the machine until it hits the stop.

The water filter ensures optimal water quality. The water filter must be replaced on schedule in order to ensure a long lifespan for the coffee machine.

#### **A** CAUTION

#### Health hazard

Contaminations could present a health hazard if the water filter is used for too long.

- Replace the filter when prompted by the machine to do so.
- Do not use dried-out or used filter cartridges.
- Take care to ensure that the filter cartridge is mounted correctly.

Tap on the Franke logo to switch to the Service Menu.

Press Configuration.

In the menu Configuration, select the menu item Care.

Press Filter replacement.

Follow the instructions on the display.

Click **Continue** when a corresponding button appears. The machine guides you to the next step.

If you require a detailed guide for a certain step, you can find this under the ① symbol in the bottom-right corner of the screen.

The machine is ready for service.

### Emptying the system

Click on the "roller shutter" to call up the dashboard.
The dashboard appears.

Tap on the Franke logo to switch to the Service Menu.

Press Configuration.

In the menu Configuration, select the menu item Care.

In the menu Config. > Care, select the menu item Empty system and confirm.

The system emptying process begins.

#### **⚠** WARNING

#### Risk of scalding

While the system is emptying, hot water and steam are released repeatedly.

 Do not touch the machine below the outlets or the outlets themselves.

Follow the instructions on the display.

Click **Continue** when a corresponding button appears. The machine guides you to the next step.

If you require a detailed guide for a certain step, you can find this under the ① symbol in the bottom-right corner of the screen.

After the emptying cycle, the machine switches back into energy saver mode.

## Maintenance plan

Frequency	Task	Information
Daily	Clean Coffee Machine	p. 32
Weekly	Clean water tank	p. 37
When prompted by the machine	Clean the brewing unit	
Monthly	Clean the coffee bean hopper	p. 25
Every two months/as necessary	Change water filter	p. 38
As necessary	Descale machine	p. 36
Annually, after every 20,000 products, or as necessary	Maintenance by Service technician	Contact a Service technician

## **CONFIGURING**

Your A200 is individually programmable – so that the A200 is just as flexible as you are. We have kept the programming simple to make your job easier. Try it for yourself.

#### Introduction to programming

Click on the "roller shutter" to call up the dashboard.
The dashboard appears.

Click on the Franke logo to switch to programming mode. The numerical pad appears for entering the PIN.

Authenticate with PIN. The menu appears.

Certain rights have been assigned to each PIN. The respective menu is displayed after the authentication.

All programming menu items are shown on the following pages. Some of these menu items may not feature on your coffee machine, depending on the configuration.

You can review and change the PIN codes with the owner role in the menu **Config/Administration/Rights** management, see p. 45.

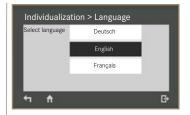

## Input

- On this page you will find an overview of the various input options for configuring the machine.
- Information on the symbols and controls can be found in the chapter "Explanation of symbols"», p. 7.

Select the input parameter that is to be set by touching the respective button.

- Press the desired Config.
- Press the return button ( to save the Config.

Press configured date. Window with numerical keypad appears.

- Enter the desired value.
- Confirm with OK.

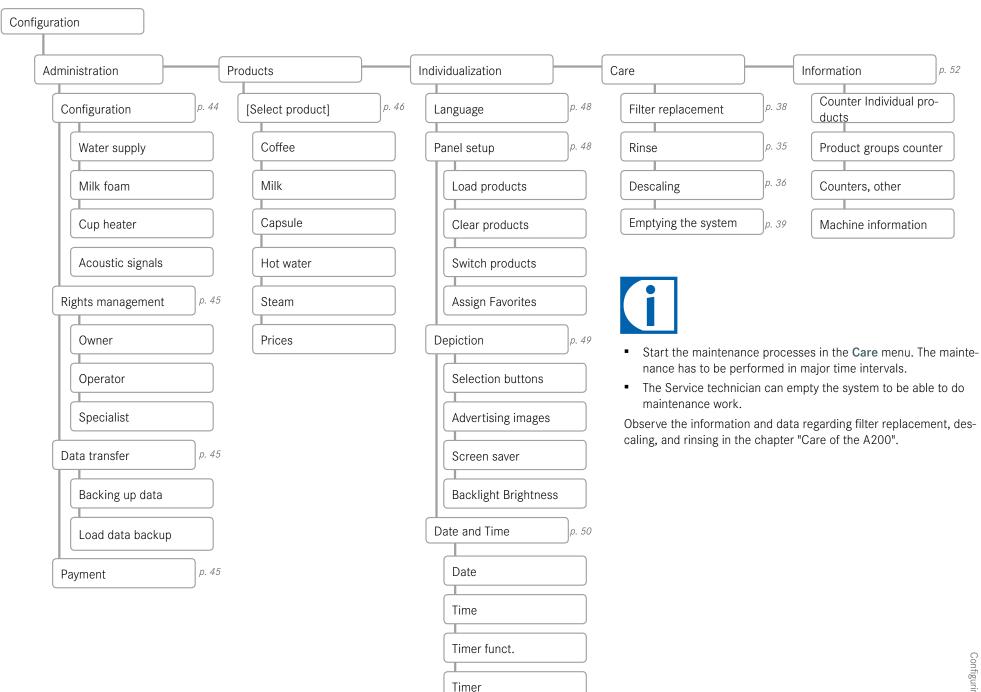

- For configuring relative values.
- Steplessly configurable.

- Binary selection
- Click on desired Config (Yes/No; On/Off).
- Press the return button (
   to save the Config.

## DECOMMISSIONING AND DISPOSAL

Do you want to shut down your coffee machine for longer periods? Call your local Service. The used capsules, all operating resources and the coffee machine can be disposed of in an environmentally friendly manner.

### Decommissioning

Clean the coffee machine and its components, see p. 32.

Empty the machine. To do this, open the menu Care and click on Empty system, see p. 39.

the machine after the system has been emptied.

Remove all food residue from

Empty and clean all containers.

Switch off the coffee machine and any add-on units. Interrupt the electricity and water supply.

Note the date of the decommissioning on the coffee machine.

#### Decommissioning for longer periods, storage

#### NOTE

#### Risk of damage to the machine

The coffee machine will become damaged if it is not stored properly.

- Contact your FRANKE service team in the event of prolonged decommissioning.
- Observe the storage conditions: Temperature: 5 °C to +50 °C, humidity: max. 80 %.
- · Empty the coffee machine.

Please contact Service for recommissioning.

The coffee machine must be serviced and cleaned before it is used again. This is the only way to ensure that the coffee machine functions properly and the products are of top quality.

## Disposal

#### Disposal of the capsules and the operating resources

- The information enclosed with the detergent applies for the disposal of unused detergent.
- Dispose of used capsules with domestic refuse or in recycling containers.
- Dispose of the fluids from the cleaning container or the drip tray in the wastewater system.

#### Disposal of the coffee machine and the FoamMaster

The A200 | A200 FM coffee machine is in compliance with the European Directive 2002/96/EU regarding waste electrical and electronic equipment (WEEE) and may not be disposed of with domestic refuse.

The tetrafluorethane (R134a) coolant used for the FoamMaster requires no special means of disposal.

Dispose of electronic parts separately.

Dispose of plastic parts in accordance with their marking.

## **TROUBLESHOOTING**

Help is available from your A200 in the event of problems. Details regarding the error and information on troubleshooting appear on the monitor screen. Should you be unable to resolve a problem, please contact your Service office.

#### Help with machine errors

The dashboard appears when there is an error.

A more detailed error message can be called up by clicking on a symbol.

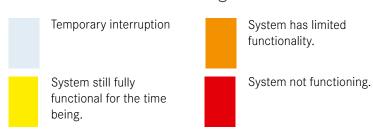

The error message contains the error code, a key word, an error description and handling instructions for rectifying the error.

Follow the instructions in the error message.

- If the entire system is affected by an error, then error messages will appear automatically.
- The machine must be restarted in the event of severe errors. Check the power supply if the machine fails to start.
- Contact your Service technician if the machine cannot be started or if you are unable to rectify the error.

#### Color code for error messages

## Help with problems concerning product quality

	Possible causes	Solution
Coffee tastes dull	Grind too coarse	Select a finer grind
	Too little powder	Increase amount of coffee
	Temperature too low	Increase temperature
	Coffee is too old	Store coffee properly
Coffee tastes strange	Poor grind	Contact customer service
	Minimal coffee usage	Load smaller coffee quantity
	Coffee beans are bad	Replace coffee beans
	Residue from cleaning agents	Rinse the machine
	Cup dirty	Check dishwasher
	Water (chlorine, hardness, etc.)	Have water quality checked
Coffee tastes bitter	Temperature too high	Lower coffee temperature
	Grind too fine	Select a coarser grind
	Too little powder	Increase amount of coffee
	Roast too dark	Change coffee
Coffee tastes sour	Temperature too low	Increase coffee temperature
	Roast too light	Change coffee
	Grind too coarse	Select a finer grind
